bath time 	bed time 	carpet time 	home corner 	

How do use:

Use the now next board to show the child what the current activity is and what comes next:

Place the picture of what the child is required to do in the 'now' box and what will be next in the 'next' box.

If the child gets distracted point to the 'now' picture to re-focus their attention. Once the task is finished, move the 'next' picture to the 'now' box and place the new next activity in the 'next' box.

This can be used at home as well e.g. now bath time - next bedtime.
